

Terafib Oven Protection sleeves

Product Information

Operating Temperature	Up to 350° F
Material	Ultem 1000
Part Number	Description

Oven Protection Sleeves, for 2.5mm and 1.25mm Ferrules to be used with the Fiber Connector Ovens. These products are re-usable, strong metal and fit all industry standard connectors such as SC, FC, ST and 1.25mm (LC, MTRJ) will protect the exposed fiber during the process of curing.

The sleeves may be attached to the ferrule of the connector before inserting the fiber. Using this product will make handling much easier for operators during the curing process and will protect the fiber during termination.
